WEDNESDAY MORNING, JULY 21, 1850.

( Our readers will remember the Grand Promenade Concert, at the new Hall of the Bellerue House, this croning, by the justly celebrated dermanin Musical Society. After the Concert is over, the Hall will be cleared and the Dancing commence. By the Programme which is published, it will he seen that there are some new pieces which the Germanians have never performed in this town; and one or two which never have been played in the country, in public. We hope to see the Hall full; the Concert will be a rare Musical treat, and the Germanians richly deserve the largest patronage, for they are Musicians of the highest order, and they devote their whole time to this their profession.

Mr. Hazard, of the Bellevne House, in this town, recently invited President Fillmore, to stop at the Bellevue House, should be visit this town this summer. The following is President Fillmore's answer :--

Washington, July 20, 1850. WILLIAM W. HAZARD, Esq., Dear Sir:---

You will please accept my thanks for your polite invitation of the 17th inst., to myself and family to make your House my home during my stay at Newport, in case I should visit that place this summer; but I regret to say that I have little prospect of enjoying the pleasure of such an excursion, this season. I apprehend my official duties will detain me here unti it is too late; but should I go, it will give me great pleasure to accept of your invitation. I am your Obt. Svt., MILLARD FILLMORE.

67- Protection Company, No. 5, of ter receiving the New York Co., Empure No. 42, and Providence Co., Hydraulion No. 1, on Friday merning next, intend to give them an escort through the town; and for this purpose they extend a general invitation to the Board of Fire Wards, the different Fire Companies, and such citizens as are disposed to unite with them, to rendez vons at their House in Touro Street on the afternoon of that day, at 2 or eleak.

Queen Victoria gave a splendid State Ball, at Buckingham Palace, on the 26th of June; several foreign Princes, the whole of the Diplomatic corps, Lords, distinguished Commons, and foreigners were present on the occasion. For the benefit of the ladies we would record these three important items:--

Her Majesty opened the ball with his Royal Highness the Prince of Prussia, the vis-a-vis being his Royal Highness Prince Albert and the Duchess of Southerland.

The Queen wore a blue silk dress trimmed with silver blond, and with wild roses (pink and white,) and ornamented with diamonds.

Her Majesty's head dress was formed of a wreath of pink and white wild laid down in pieces from one to three roses, richly ornamented with dia- pounds and each covered entirely with mends, to correspond with the dress.

LATER FROM CALIFORNIA.

This steamer Croscent City arrived at New York Monday afternoon, bringing the following intelligence from California: The Crescent City brings \$180,000 in

gold dust in the hands of the passungers, The steamer Columbus arrived at Pana-

ma on the 6th inst., having left San Francisco on the 18th of June; she brought 1'0 passengers and \$150,000 in gold dust on freight, and the mails.

The \$150,000 in gold dust brought up freight by the Columbus was detained at Chagres to await the arrival of the steam. ship Charokee.

The ateamer West Point arrived at Panams on the 4th of July, and will leave on the 15th for San Prancisco.

By this arrival we have full files of California papers to the 18th of June, 18 days later, but the late hour at which they are received (past two o'clock) makes it impus\_ sible to give more than a cursory glauce at their contents.

.The most important intelligence is that there has been another destructive fire at San Francisco. About 300 houses were destroyed, and the loss is variously estimated at from three to five millions of dollars.

The fire originated in the Sacramento bakery, a small wooden building in the rear of the Morchants Hotel, and was caused by a defect in the chimney. It commenced a little before eight o'clock A. M.; and as the wind was high at the time it communicated quickly with the adjoining buildings. The Alta California says :---

The fire was quickly communicated to the Merchant's Rotel, the Waverly House, and the Sacramento, and thence it progressed rapidly, destroying all the buildings on the south side of Clay street, from Kearny street to the water.

On the north side of Clay street all the buildings between Kearny and Mantgom-ry, except Messrs. Battell's and Edeard's -Sacramento street, from Kearny street to the water, has not a building remaining-California street, north side, from the Cuetum House to Kearny street, is destroyed. and all the most valuable buildings on the same side of the street below Montgomery.

The east side of Kenray street is in rule, between Clay and California streets; every building on Montgomery street, between Mr. Nagleo's and Mr. Cannon's auction store on the one side, and Clay et. wharf and Adams & Co.'s on the other, were also dustroyed.

Butween Montgomery street and the wator much valuable property was consumed, including all the buildings on Central Wharf, and a large quantity of lumber,

A vast amount of the property destroyed yesterday was in the bands of commission merchants, and heavy losses will fall upon the shippers, principally in New England and New York.

From the San Francisco Herald, June 17. The intelligence from the mines is of such a nature, as to prove there will be bo a greater quantity of gold dug out this Summor than over before. We scarcely know whether the San Joaquin or the Sacramento, has sent out the richest specimens -but gold comes from both regions in sufficient quantities to prove that there was litthe extravogance in the assertion that the ore is inexhaustible. It has been found, too, as far North as Oregon, and sa far

South as the mountains near Los Angles. There appears to be a ridge of gold-bear ng quartz running the whole length of the country North and South. The ere has been found richer in the mountains of Los Angeles than even in the mines of Maripo-We have seen large masses from both localities. As found in the former place, it will require the employment of science and machinery-the one to direct operations, and the other for grinding the reck-and with these two agents ongaged, it will afford, from the immerse quantity that exists sufficient coupleyment and conpensation for three-fourths, at least, of all the superfluous labor of the United States.

It will be seen by our communical report, the business has been drooping for some time past in all our principal cities. In Stockton, the merchants ascribe the depression in some measure to the operation of the law requiring foreigners to purchase liconsos. The law was as it might be expoeted, extremely unpopular at first among that along of minors latterly they have become more reconciled to its operation, and have in most instances, we believe, returned to their work.

The recent murder of Glanton's party by the Yumas at the mouth of the Gila, has caused an order to issue for a detachment of the U. S. troops to proceed to that point for the protection of the emigrants, and for the punishment of the murderers. Captain Lyon has also proceeded to the head waters of the Sacramento to investigate the particulars of Captain Warner's murder in No-Veinber last.

WASHINGTON, Monday, July 22. SENATE. - A communication was received from Mr. Webstor, resigning his scat in the Senate.

Mr. Houston presented resolutions passed at certain meetings in Matagords, Toxas, in vindication of territorial claims, and added a few remarks.

Mr. Jefferson Davis presented a beautifully executed momento to the late President, dedicated to the people of the United States, by a Hungarian exile. Referred to the committee on libraries.

Mr. Douglass gave notice of a resolution to change the rule in order to adopt the provious question.

At 19 o'clock the apecial order was taken up and Mr. Clay rose to make a concluding apcech as chairman of the compromise com-

He proceeded to answer the surious objections ; first, he said, it had been erroneously argued that the country was quiet .--On the contrary he said all the tendencies of the times were toward disquiet, if not more fatal consequences.

In proof of his argument he instanced the assembling of the convention at Nashville; the resolutions of various states and logislatures, on the subject of abuliting and fugitive slave agitation.

He referred also to the establishment of sectional presses, and the circulation of disunion pamphlets, in various parts of the

York, went ashore on Fire Island, about 5 mins east of Fire Island light, at 3 A. M. Friday the 19th inst., and went to piecess immediately on atriking the leach. Portions of the wreck are strewn along the beach for two miles.

There were on board five cabin passengers, and eighteen men belonging to the ship. Pivo of the crew perished, with all the passengers. The passengers' names could not be ascertained, with the exception of one, Henry Summer, or Summer, of Boston. The captain's wife, with her child, was on board. She was saved, but the child was lost. Capt. Healey died at Legorn of small pox, just previous to the sailing of the vessel.

The Elizabeth had a full cargo, consist-

The Elizabeth had a full corgo, consisting of marble, oil paintings, castile scap, &c. She had also on beard Powers' statue of John C. Calhonn which has gone to the bottom. It is expected it will be recovered.

Among the passengers who purished on board the Elizabeth, we regret to learn was a lady of literary renown, well known through the country-Miss Margaret Fuller formerly, but recently bearing the title of Countess Ossoli, acquired by marriage while in Italy. Her husband and child accompanied her, and were also lost. The body of the child, two years old, was washed ashure.

The following names of the lost are given in addition to the Count and Countess Ossoli, and child, viz . General Sanford, of Sweden ; Horace Mann, of Boston ; Geo. Bates, of England, (steward); Henry Westerrelt, of Germany. But there do not include all.

WELL GUARDED .- A country youth, who had returned home from a visit to the city, was asked by his anxious dad, if he had been guarded in his conduct while he was there. "Oh! yes," replied the ingenuous lad, " I was guarded by two constables most of the time!"

The Handsomett, Chemest, and Best Article for Light, is MAISIUS PATENT OIT.

MARSIUS PATENT OH.

THIS is a new invention, recently introduced, and new very extensively used by the public.

Mr. Marsh is consensually receiving, flosh at homeand from abroad, the very highest testimulate of the true accrite used great superiority of his new Oil, over everything before used for light.—Among them we select the following:

MARSIUS PATENT OTL.—This is the marce given to a newly invented Oil, for producing light, which has just been internduced to the public by Mr. Marsh. Having tried it correlate, we can speak from experience, and do not bestude to award it a high order of merit. It is entirely free from grease or such white harming, and is not line to the content of public tried too common disection of almost all harming fluids, that of explosion. It gives a beautiful and steady light, is much hardboner than oil, and costs less. For a slight expresse, common glass lamps may be litted with new takes, and the oil harming thintern.

We recommend a trial to those who would obtain a beautiful light.—[Boston Loursal.]
